3-Digit Addition with Expanded Form Strategy No Regrouping

Example - Expand the digits into expanded form and line up the numbers by place value. Add up the values in each column. Then rewrite the answer in standard form.

$$\begin{array}{r}
 362 + 535 = 362 \rightarrow 300 + 60 + 2 \\
 \underline{+535} \rightarrow +500 + 30 + 5 \\
 \hline
 800 + 90 + 7 = 897
 \end{array}$$

Directions: Solve the problems using expanded form strategy.
